

Monish Reddy Edulakanti

Technical Solutions Consultant | APIs & Integrations | AI-Accelerated Troubleshooting | Client Delivery
New York, NY | +1 (812) 262-4911 | emonishreddy@rediffmail.com | linkedin.com/in/monish-reddy-edulakanti | github.com/monishreddye

SUMMARY

Technical solutions professional with 6 years of experience as the primary technical contact for enterprise clients (FedEx, USAA), diagnosing complex API, integration, and production issues and translating findings into clear recommendations for technical and non-technical stakeholders. Strong record of root-cause analysis across data flows and architectures, AI-integrated workflows, self-serve troubleshooting documentation, and cross-functional delivery — with measurable outcomes: 40% faster resolution, 15+ hours/week saved, 99.9% availability.

TECHNICAL SKILLS

Consulting & Client Delivery: Partner/client advisory, technical discovery, escalation management, root-cause analysis, solution recommendations, release coordination, post-launch support, executive stakeholder communication

APIs & Integrations: REST APIs, API documentation review, request/response debugging, authentication (LDAP/SSO), integration troubleshooting, FastAPI, XML, webhooks, data-flow analysis

AI & Automation: AI-integrated workflows, prompt/context engineering, AI agent orchestration, AI-assisted root-cause analysis and documentation, process automation, quality/accuracy reviews

Programming & Data: Python, PowerShell, SQL, C#/.NET, JavaScript, React, SQL Server, Power BI, Excel, operational metrics and incident-trend analysis

Cloud & Platforms: Azure, Google Cloud, Firebase, Windows Server, IIS, DNS, TCP/IP, load balancing, ServiceNow, Jira, Confluence, Git, RSA Archer IRM, ITIL 4, Agile

EXPERIENCE

Indiana State University

Mar 2024 – Dec 2025

Graduate Assistant — Technical Solutions & Application Support

Terre Haute, IN

- Served as technical point of contact for faculty and administrative stakeholders: gathered requirements, recommended Firebase and Google Cloud solutions, secured deployment approvals, and supported web application delivery end to end.
- Integrated AI models into university workflows to accelerate analysis and content development — with quality and accuracy reviews before rollout — measurably reducing manual effort and human error; maintained applications post-launch, resolved access and configuration issues, and authored self-serve troubleshooting documentation.

HCLTech — FedEx and USAA accounts

Sep 2019 – Dec 2023

Senior Analyst (promoted from Analyst and Graduate Engineer Trainee)

Chennai & Noida, India

- Served as the primary technical point of contact for FedEx users, application owners, and engineering teams — diagnosing and resolving issues across applications, APIs, and infrastructure to unblock client operations, from intake through post-launch support.
- Troubleshoot complex API and integration failures by reviewing API documentation, requests/responses, logs, SQL records, authentication, and downstream dependencies; identified root causes across client data flows and architectures and guided implementation of fixes.
- Collaborated cross-functionally with application, database, infrastructure, and network teams to coordinate releases, launch changes into production, and support existing systems, sustaining 99.9% availability for business-critical services.
- Identified recurring patterns across incidents and built scalable fixes and automation in Python, PowerShell, SQL, and REST APIs for system checks, validation, and reporting — reducing manual effort 70% and saving 15+ hours per week across the support funnel.
- Authored implementation playbooks and troubleshooting guides with validation and recovery steps, published to the internal knowledge base — enabling client self-service, cutting resolution time by 40%, and mentoring peers on complex troubleshooting scenarios.
- Used operational metrics, incident trends, and validation results to evaluate solution effectiveness and communicated outcomes and recommendations to business and engineering stakeholders at all organizational levels.

PROJECTS

Monish Labs | Financial Data & Analytics Platform — Python, FastAPI, REST APIs, SQL Server, React

2025 – Present

- Built an end-to-end market data and analytics platform spanning ingestion, validation, monitoring, and reporting, with automated checks for data-quality and integration failures across API, database, and client layers.
- Orchestrated AI agents within development and operational workflows — delegating repetitive analysis, monitoring, and documentation tasks to autonomous processes — applying prompt/context engineering to improve output quality.

EDUCATION

Indiana State University

Terre Haute, IN

Master of Science in Computer Science

Jan 2024 – Dec 2025

Jayamukhi Institute of Technological Sciences

Warangal, India

Bachelor of Technology in Computer Science and Engineering

Aug 2015 – May 2019

CERTIFICATIONS & RECOGNITION

ITIL v4 Foundation (2020) | HCL Distinguished Performance Award (2022) | ServiceNow Administration Fundamentals (in progress)
